

YURI

Now on Nintendo Switch™

WARM UP YOUR FINGERS, CLOSE YOUR EYES AND TAKE A DEEP BREATH...
YOU'RE ABOUT TO ENTER THE DEPTHS OF YURI'S WORLD.

YURI is a platform game with a unique atmosphere. You'll need dexterity, curiosity and the ability to go with the flow to help Yuri overcome all the obstacles and reach the goal of his mysterious journey. Explore an exuberant and sensitive world, full of secret passages and buried memories.

YURI is a real indie gem, lovingly developed over six long years
by the Potier brothers, Ange and Aurélien.

With its sumptuous drawings and dazzling soundtrack,
YURI is a world of its own, both poetic and demanding.

Start this fantastic journey and get ready to explore a mysterious forest from another age, the bowels of the earth, an old family house, Yuri's most hidden dreams and infinite space...

THE STORY BEHIND THE GAME

Yuri is a cosmonaut/explorer who ventures through the worlds of memory and imagination.
He was created by Ange Potier and went on his first adventures in a comic.

A few years later, Ange and his brother Aurélien, a multimedia author and musician,
decided to combine their talents to create the video game of their dreams.

YURI is inspired by the old family home in Brittany, France,
where the two brothers spent their vacations. This house was surrounded by lush,
untamed nature that they've recreated in a playful, organic style.

Aurélien lives near Paris. Ange is in Buenos Aires.

YURI's development took six years of back and forth between the two continents.
Six long years of sharing, dreaming and remembering, of sounds, images and hard work.
And now, 16 long levels... the game is complete, at last!

YURI has now got a life of its own OUTSIDE the game! More and more
live concerts are taking place around France and Europe.

In Yuri's Concerts, gamers listen to the YURI's soundtrack
played live while playing on a big screen. An incredible experience.

ANGE POTIER

is a designer and animator. He shares his life between France and Argentina.

He is the author of the book "Camille Peint" with texts by Eve Loreaux (2005) and the animated film "El Bosque" inspired by the universe of Jérôme Bosch (2011).

With his drawings and animations he has participated in 5 shows directed by Argentinean choreographer Paula Manaker and two circus shows by Samuel Tétrault (Compagnie Les 7 doigts de la main). He created Yuri in 2005.

AURELIEN POTIER

is a multimedia director. In 2010 he co-founded the creative app studio Fingerlab, awarded in 2012 at the Apple Design Award with the app DM1 : The Drum Machine.

Also a musician, he has performed in numerous ensembles, between jazz, rock and contemporary music (Centenaire, Section Amour, Organ, Raptus, ...) and co-composed the music of the game Yuri.
